

Linear Slide Capabilities

Taking into account the various degrees of accuracy and sizes required for different applications, PIC carries a full range of sizes, configurations, and accuracy grades. If our standard selection doesn't meet your requirements, we're also happy to modify a standard linear slide to fit your specifications. Standard parts and custom fabricated linear slides are available in these ranges:

Travel: .5" to 12"

Height: .126" to 1.77"

Straight Line Accuracy: .001" to .00008" /inch

Width: .26" to 3.937"

Our linear slides are typically offered in your choice of aluminum or steel.
